MATERIAL HEALTH

All sites

This Material Health indicator is based on the Cradle to Cradle Certified™ Products Program, a leading label in the field of circular economy for which Material Health is one of the 5 criteria analysed (other criteria considered: product circularity, energy consumption and carbon management, water stewardship, social Fairness). In particular, this indicator analyses compliance with the underlined banned list of the C2C Certified™ Products Program. In addition, it promotes products for which material health is proved, i.e. verified by an independent third party.

Please note that the figures given below are based on the information provided in the platform. Incorrect or missing information can lead to unrepresentative results for your deposits.

HEALTHY PRODUCTS

The product contains only substances validated as healthy: in addition to verifying the C2C Certified® Standard banned list*, it does not contain any substances evaluated as CMR (Carcinogenic, Mutagenic, Reprotoxic) and their VOC (Volatile Organic Compounds) emissions are controlled for better indoor air quality. This corresponds, for example, to product that has obtained a Silver, Gold or Platinum level in the Material Health category of the C2C Certified® Standard Version 4.0 (Gold or Platinum in Version 3.1)
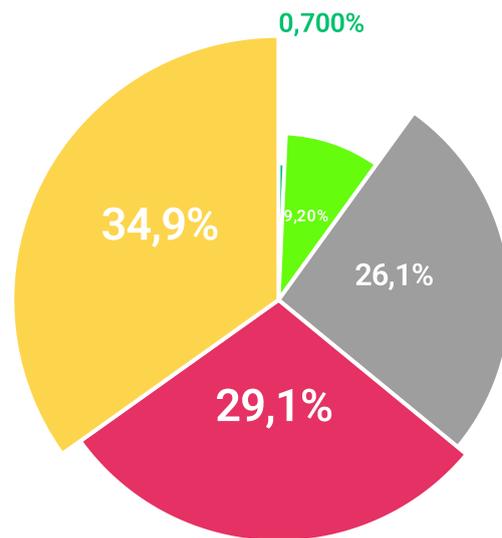

PRODUCTS WITH CONTROLLED AND VERIFIED TOXICITY

The manufacturer declares that its product does not contain any substance from the C2C Certified™ Products Program banned list above the tolerated thresholds and this has been verified by an independent third party.

PRODUCTS WITH CONTROLLED TOXICITY

The manufacturer declares that its product does not contain any substance from the C2C Certified™ Products Program banned list above the tolerated thresholds but this claim has not been verified by an independent third party.

PRODUCTS WITH UNKNOWN TOXICITY

The manufacturer has not provided sufficient information regarding the toxicity of its product.
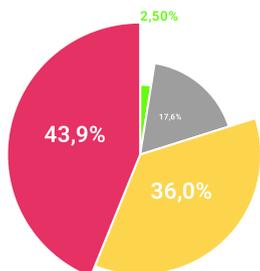

PRODUCTS WITH KNOWN TOXICITY

The manufacturer has stated that its product contains substances from the C2C Certified® Standard's "banned list of substances*" above the tolerated thresholds.

ERROR REPORT (2 errors , 6 warnings)

-4-

Here are listed the errors and warnings that were generated during the calculation of the report. They are generally linked to insufficient or imprecise filling of product passports.

⚠ - Warning: a data is missing - the concerned deposit has been taken into account but the result of the indicator for this deposit may be non representative or partial

✖ - Error: an important data is missing - the concerned deposit could not be taken into account in the calculation of the indicator

In both cases, we recommend that you modify or obtain the modification of the passports used, in order to obtain more accurate and qualitative reports.
