

Noah

The reuse search engine

Find and compare in just a few clicks thousands of reusable, destocked or reconditioned products, available across UK and Europe.

CIRCULAR ECONOMY · CONSTRUCTION · EX-SITU REUSE

« With so many marketplaces out there, Noah centralises access to the best reuse offers — price, distance, environmental impact — in a single search engine. »

WHAT IS NOAH?

The ex-situ reuse comparator

Noah is the search and comparison module for **ex-situ** of the Upcyclea platform. It aggregates in a single access the stocks available from the main marketplaces, reuse stores and partner resellers.

Until now, project owners and design teams had to navigate between multiple sites. **Noah centralises all:** a single engine, thousands of products, instant multi-criteria comparison.

Stocks come from dismantling, site surpluses, reconditioning and manufacturer destocking — **immediately available through resellers, with no commission.**

- **Multi-criteria search**

By category, location, quantity, date and delivery location.

- **Price / distance / CO₂ comparison**

Select the best product based on your economic and environmental criteria.

- **Free access via Upcyclea**

An Upcyclea account is all you need to activate Noah and access all partner stocks.

- **Complementary to ROMULUS**

Noah covers ex-situ reuse; London's ROMULUS manages in-situ stocks from Pre-Demolition Audits.

Why use Noah?

Operational, regulatory and environmental benefits

MODULE
UPCYCLEA

BENEFITS

Simple, centralised and streamlined access to ex-situ reuse

One access, all offers

No more jumping between sites. Noah aggregates stocks from dozens of marketplaces and reuse stores in a single point of access.

Decarbonisation of assets

Reused products have zero embodied carbon under the RICS convention, directly reducing Scope 3 embodied carbon.

Economic optimisation

Compare prices and logistics distance to source the most competitive resources and unlock value from site surpluses.

Regulatory compliance

Meet the requirements of the AGEC Act, PDA audit, and RICS thresholds, with documented and traceable evidence.

Resource preservation

Every reused product avoids virgin material extraction and diverts resources from the waste stream.

Simplified CSRD reporting

Reuse outcomes (CO₂ avoided, waste avoided, water saved) feed directly into the UK SRS E2 indicators of the non-financial report.

AVAILABLE PRODUCT CATEGORIES

Wood & panels	Joinery	Floor coverings	Technical equipment	Heaters	Sanitary
Electrical cabling	Carpets & textiles	Flat glass	Metal elements	Paints & coatings	Professional furniture

USERS

Noah is designed for all construction stakeholders

Project owners Landlords, funds, developers	Architects & project managers Reuse specification in design	Deconstructors Distribution of PEMD stocks
Manufacturers Destocking & reconditioning	Reuse stores Local marketplaces	Construction companies On-site reuse sourcing

Access Noah for free

Create an Upcyclea account and activate the Noah module in minutes.
